SUMMARY

Software Engineer with hands-on experience designing scalable backend systems, distributed microservices, and secure cloud-native applications. Specialized in **Java**, **Spring Boot**, **REST APIs**, **React**, CI/CD automation, and API security (**SAST/DAST**, **JWT**). Proven ability to optimize performance, harden systems, automate deployments, and deliver high-availability software using modern DevOps tooling.

EXPERIENCE

Software Engineer

July 2024 – August 2025

University of Cincinnati

Cincinnati, OH

- Engineered distributed backend services using **Java**, **Spring Boot**, and **REST APIs**, improving system uptime to 99.3% and powering high-traffic UC Library workflows.
- Designed automated deployment pipelines using **Docker**, **GitHub Actions**, and Linux scripting, reducing deployment overhead by 41% and increasing release velocity.
- Implemented secure API gateways using **JWT**, enforced **SAST/DAST** scans, and resolved critical vulnerabilities, strengthening application security posture.
- Enhanced performance through caching, DB query optimization, and service refactoring, reducing request latency by 27%.

Software Development Associate

June 2022 – December 2023

WCY Solutions Pvt. Ltd

Hyderabad, TS

- Developed modular microservices using **Java Spring Boot** and integrated **MongoDB** for scalable data persistence, improving system throughput for production clients.
- Collaborated with QA & DevOps in Agile sprints, contributing to stable, versioned releases and increasing delivery quality by 24%.
- Refactored legacy codebases and optimized middleware logic, reducing defect recurrence by 31% and modernizing internal services.

Software Engineer Intern

January 2022 – April 2022

WestAgileLabs

Hyderabad, TS

- Developed core backend modules using **Java**, **JDBC**, and **MySQL**, automating business workflows and improving cross-module data consistency.
- Optimized APIs and SQL queries, lowering data-fetch time by 28% and improving downstream application responsiveness.
- Contributed to system integrations, bug fixes, and SDLC enhancements while collaborating with product and QA teams.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL, TypeScript

Backend: Spring Boot, Microservices, REST APIs, Hibernate, JPA, JDBC, Maven

Frontend: React.js, HTML, CSS, Bootstrap

Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Kubernetes, GitHub Actions, Jenkins, Linux, CI/CD

Databases: PostgreSQL, MySQL, MongoDB, Oracle

Security: SAST, DAST, OWASP, JWT/Auth, API Hardening

Tools/Platforms: Git, GitHub, Postman, Kafka basics, Agile/Scrum

Other: Distributed Systems, JUnit, Mockito, System Design

CERTIFICATION AND ACHIEVEMENTS

- AWS Certified Solutions Architect – Associate (SAA-C03).
- Google Cloud Data and Storage Foundations.
- Penetration Testing: Advanced Kali Linux.
- MTA: Introduction to Programming Using Java-Certified 2022.

PROJECTS

AI-Powered Portfolio Chatbot <i>Java, Spring AI, Python, RAG, PostgreSQL</i>	July 2025
- Designed an intelligent chatbot using Spring AI with a RAG pipeline to answer portfolio/resume queries with contextual accuracy. - Implemented pgvector-based vector indexing, improving semantic retrieval quality by 46%. - Automated resume-tailoring workflows, reducing manual customization effort by 51% with dynamic Q&A generation.	
Investigating Salary Trends <i>Company Ratings vs. Offered Salaries Analysis</i>	April 2025
- Analyzed 12.4K+ job postings and company reviews to examine correlation between employer ratings and offered salaries across industries. - Designed SQL queries and Python ETL pipelines to preprocess structured/unstructured salary data, improving data accuracy by 27.6%. - Built dashboards and visualizations with Matplotlib/Seaborn, enabling recruiters and job seekers to make informed decisions. - Identified patterns such as companies with ratings above 4.0 offering 16.8% higher median salaries.	
Smart Email Assistant <i>Java + Spring AI + RAG + PostgreSQL + Docker</i>	March 2025
- Built an NLP-powered email classification and auto-reply engine integrating REST APIs with dashboards for real-time visibility. - Automated high-frequency email operations, reducing manual handling by 42%. - Implemented secure backend logic in Java, reducing response latency by 37%.	
Pomodoro Study Tool <i>React + Firebase + JWT + GitHub Actions</i>	October 2024
- Built a real-time collaborative productivity app using React and Firebase supporting multi-user synchronized sessions. - Implemented JWT-based access control improving session reliability and reducing authentication issues by 33%. - Integrated CI/CD through GitHub Actions, increasing deployment stability by 34%.	

EDUCATION

University of Cincinnati	Cincinnati, Ohio
<i>Master of Science, Information Technology</i>	<i>January 2024 – May 2025</i>
Malla Reddy Engineering College	Hyderabad, Telangana.
<i>Bachelor of Technology, Electrical and Electronics Engineering</i>	<i>August 2019 – June 2023</i>
